TITLE OF INVENTION: METHOD AND ARRANGEMENT FOR DETECTING A RADIO COVERAGE

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	NO	\$1510	\$300	\$0	\$1810	05/03/2011

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax (571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 344 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 344 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 14-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Consider independent claim 14, the best prior arts founds of the record during examination of the present application are:
 - a. Genell et al. (6,122,505 hereinafter Genell)
 - b. Solondz (US 6,862,447 B1)

In the view of the present application, Genell discloses, a communication system, which includes scattered base stations that are operated in the normal mode. Genell further discloses, the communication system uses its existing sources to test its base stations, and places at least one base station of normal operating mode into a test mode. For example, the base station in testing mode is refer to as the testing base station, while the other base station in normal operating mode, referred as tested base station. When testing the receiver/transmitter path, the tested BTS operating in normal mode, receives/transmits test signals to the testing BTS over uplink/downlink RF channel. The received signal quality parameter, such as RSSI, is measured at the tested/testing base station and is reported to the BSC. And the BSC then routes the test results to the MSC for further processing, such as comparison with various threshold results. However, Genell does not discloses,

Art Unit: 2617

consecutively switching the plurality of base stations, one at a time, from the normal operating mode to a measuring operating mode, and measuring by one switched base station in the measuring mode, with locally adjacent base stations in the normal mode, and switching the one switched base station in the measuring operating mode back to the normal operating mode, and wherein the consecutive switching of base stations to the measuring operating mode, the measuring of the field strength, the synchronizing, the measuring of the synchronicity quality, the sending, and the switching of the one switched base station back to the normal operating mode is repeated such that each of the plurality of base stations is switched to the measuring operating mode.

In the view of the present invention, Solondz discloses, the method in which the mobile terminals in the coverage areas of other base stations or is using other base stations to make operational measurements of the signals transmitted by the base station of interest in a wireless communication system, where the wireless communication system made of plurality of cells and each includes a base station. A MSC communicates with each base station communicates. The MSC has an additional main control unit (MCU). The MSC has an additional main control unit (MCU) when formed as part of MSC it utilizes the memory and the user interfaces supplied by the MSC. Solondz further discloses, a first base station (base station of interest) or the MCU generates an operational measurement request to at least a second base station, which is an identified base stations that receives measurement request and identifies the

Art Unit: 2617

signal transmitted by the base station of interest to measure, by requesting to instruct mobile terminals in communication second base station (Identified) to make operational measurements of at least one signal transmitted the base station of interest. These operational measurements include at least one of signal strength, signal-to-noise ratio, frame error and bit error rate of base station of interest. Upon the measurement request, the second base station receives the operational measurement from the mobile terminals and it sends the received results and the associated location information to the MCU. The MCU create a map of received results based on the location information associated with each measured results and MCU may then create a map of the received results based on the location information associated with each measurement results. However, Solondz does not discloses, consecutively switching the plurality of base stations, one at a time, from the normal operating mode to a measuring operating mode, and measuring by one switched base station in the measuring mode, with locally adjacent base stations in the normal mode, and switching the one switched base station in the measuring operating mode back to the normal operating mode, and wherein the consecutive switching of base stations to the measuring operating mode, the measuring of the field strength, tile synchronizing, tile measuring of the synchronicity quality, the sending, and the switching of the one switched base station back to the normal operating mode is repeated such that each of the plurality of base stations is switched to the measuring operating mode.

Compared to the present invention neither Genell or Solondz discloses, “consecutively switching the plurality of base stations, one at a time, from the normal operating mode to a measuring operating mode, and measuring by one switched base station in the measuring mode, with locally adjacent base stations in the normal mode, and switching the one switched base station in the measuring operating mode back to the normal operating mode, and wherein the consecutive switching of base stations to the measuring operating mode, the measuring of the field strength, tile synchronizing, tile measuring of the synchronicity quality, the sending, and the switching of the one switched base station back to the normal operating mode is repeated such that each of the plurality of base stations is switched to the measuring operating mode.”

Accordingly, in light of the cited references, the present invention is novel and non-obvious since the prior arts of record do not contain either explicitly or implicitly the limitations as a whole as disclosed in claim 14. In addition, any reasonable combination of the cited references cannot be used to reconstruct the claimed invention. Therefore, the present application as claimed is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarwat Chughtai whose telephone number is (571)270-7272. The examiner can normally be reached on Monday-Thursday 8:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick Corsaro can be reached on (571)272-7876. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
